

We want to thank you for choosing **EDISS CHIROPRACTIC**. Our goal is to provide the best state of the art alternative health care in the Douglas area. We appreciate your trust in us and look forward to serving your chiropractic needs.

To provide the best care possible, regardless of the area of complaint, Dr. Ediss conducts a complete examination on the first office visit in order to investigate and eliminate any possible underlying causes of problem areas. Because the body functions as a complete unit, something that may seem unrelated could actually be contributing to your symptoms.

The nature of the onset of symptoms, the duration of symptoms, your age, present and past health problems are all contributing factors affecting the duration of recovery as well as the amount of progress achievable. In some situations, patients may actually feel a little worse before they begin to feel better. This is because the body has been accustomed to being in a given position for weeks, months or even years. As corrections are made, the nervous system adapts to the body's new (corrected) position. This is very similar to the patient who experiences orthodontia work. Every time the doctor adjusts the braces, the patient experiences head pain until the nervous system adapts to the new position of the teeth. Since there are so many variables, it is difficult to predict the time schedule or efficacy of the chiropractic procedures. Sometime the response is phenomenal.

In most cases there is a more gradual, but quite satisfactory response. Occasionally, the results are less than expected. Two or more similar conditions may respond differently to the same chiropractic care. Many medical failures find quick relief through chiropractic. In turn, we must admit that conditions which do not respond to chiropractic care, may come under the control or be helped through medical science. The fact is that the science of chiropractic and medicine may never be so exact as to provide definite answers to all problems. Both have made great strides in alleviating pain and controlling disease.

Dr. Ediss incorporates and utilizes many techniques in the care and treatment of his patients. When he is working with a patient it is at that time that he will make the decision on which technique he will utilize for your condition. (Please see our web-site for the different services we offer.)
